Office Action Summary

RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 14-23, drawn to an input device having selecting and executing a task, classified in class 379, subclass 368.

II. Claims 24-30, 36-40, 42-43 drawn to a display format and its highlight bar, a movement key and an execution key, classified in class 345, subclass 810

J. III. Claims 31-35, 41, ⁴⁴_^ drawn to a combination of first and second key sections, and a calling function, classified in class 379, subclass 433.06.

2. Inventions Groups I, II and III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention in Group I can be a PDA type of device, it does not require the specific format of the displayed information and its highlighting as it is required in Group II, nor the two key sections and its calling function in Group III. The subcombination has separate utility such as displaying art and selection in a computer for Group II, or the phone operation in Group III.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Mr. Mainak Mehta on 8-3-01 to request an oral election to the above restriction requirement, but did not result in an election being made, and Mr. Mehta has requested for a written restriction.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chiang whose telephone number is 703-305-4728. The examiner can normally be reached on Mon.-Fri. from 8:30 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Admad Matar, can be reached on (703) 305-4731. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9314.
